

Lead Reservoir Engineer

Company	Criterium Energy
Department	Exploration and Development
Location	Calgary, Alberta, Canada
Reporting	Chief Operating Officer

About Us

Criterium Energy Ltd. is a publicly traded upstream energy company focused on the acquisition and sustainable development of assets in SE Asia that are capable of scalable growth and cash generation. The Corporation focuses on maximizing total shareholder return by executing on three strategic pillars, namely (1) successful and sustainable reputation, (2) innovation and technology arbitrage, and (3) operational and safety excellence.

Criterium's Indonesian portfolio is currently comprised of a 42.5% non-operated interest in the long-life Bulu PSC and will include a 100% operated interest in the producing Tungal and West Salawati PSCs upon completion of the acquisition of Mont D'Or Petroleum Ltd. expected in July 2023. This transaction will establish the company as a reputable operator in Indonesia and Southeast Asia. The Corporation intends to deliver a balanced portfolio through high cash flow later life assets, near term growth assets and longer life development assets to maximize shareholder returns while managing its balance sheet.

Why work with us?

Want to make an Impact? At Criterium our people are our most valuable resource. We're a diverse team of passionate individuals, guided by our values, who are excited to shape the future of energy. As a new member of our team, you should be committed to life-long learning and are encouraged to bring fresh new ideas to solve complex problems. We recognize that innovation and success are a result of providing our people with the right tools. At Criterium, our corporate and employee values are aligned to foster an environment of respect and growth. We believe in providing equal opportunities across all offices and jurisdictions.

The world is rapidly changing. Join us in our goal of providing sustainable energy to the worlds growing economies. Be a part of the solution.

Job Description

Purpose

The Lead Reservoir Engineer role will report directly to the Chief Operating Officer and oversee the production and subsurface aspects of reservoir management and development activities for the companies' assets as well as play a critical role in business development as it pertains to new ventures evaluations and the company's corporate strategy.

Responsibilities

- Lead reservoir management and development evaluations within the companies' assets which include production allocation, forecasting, reservoir simulation studies, reserves evaluation and annual corporate business plan activities
- Take ownership in production optimization and generate novel ideas to enhance field performance
- Complete subsurface and regulatory work for exploration/appraisal and development programs
- Evaluate new ventures opportunities, participate in data reviews and provide guidance to management
- Attend commercial/technical meetings with Criterium partners, government bodies, banks and auditors
- Mentor junior staff to adopt best practices and develop their technical abilities

Qualifications

- Must be legally entitled to work in Canada
- B.Sc. Degree or higher in petroleum engineering or a related engineering discipline
- Minimum 10 years of E&P relevant experience in reservoir engineering
- Technical expertise in reservoir simulation, management, field development planning and production forecasting. Cross-disciplinary background in production engineering with a strong business acumen
- International experience is considered a strong asset
- Familiar with reserves reporting in accordance with COGEH principles
- Prior experience in the redevelopment of brownfield through in-fill drilling and EOR techniques
- Excellent communication and interpersonal skills, including the ability to work effectively in a team
- Willingness to travel to international locations as needed

Personality Traits

At Criterium we're looking for an individual who has an **entrepreneurial spirit**, someone whose **creative** and willing to think outside of the box to drive innovation. We desire team members to be **adaptable**, who can pivot quickly and thrive in a fast-paced culture. As we grow, we need individuals who can step up to be **leaders**. We operate in multiple jurisdictions; therefore, we value the power of strong **communication**. Above all we're seeking someone who is **passionate** about energy.
